

DULNINDU SARANGA

Computer Science Undergraduate

Education

University of Westminster, UK 2024 – Present
BSc (Hons) in Computer Science – Undergraduate

Ananda College, Colombo 10 2010 – 2023
G.C.E. O/Ls – 2021 (2020)
G.C.E. A/Ls – 2022 (2023)

Aquinas College of Higher Studies 2023 – Present
Diploma in English (Intermediate Level Completed)

Informatics Institute of Technology (IIT)
2025(October)– 2026(March)
Professional Certificate in Cyber Security and Networking

About Me

Computer Science undergraduate with strong interest in software development, front-end design, and problem-solving. I enjoy building Python applications and responsive websites using HTML, CSS, and JavaScript. I'm also expanding my skills by learning Blender 3D modeling and basic UI/UX design.

Skills

- Programming Languages:
Python, C, C++, JavaScript and Java
- Web Development:
HTML5, CSS3, Responsive Design, JavaScript
- Software Engineering:
OOP, Modular Design, Debugging,
SDLC Documentation
- Database & File Handling:
JSON, File I/O, Data Persistence
- Tools & Technologies:
Tkinter, Flask (Basic), Git & GitHub, VS Code,
PyCharm, Microsoft Office
- Soft Skills:
Leadership, Teamwork, , Problem-Solving,
Time Management, Adaptability
- Languages:
Sinhala, English

Academic & Personal Projects

1. Task Manager (CLI → GUI Hybrid)

Tools: Python, Tkinter, JSON 2024(February) – 2025(April)

- Built a multi-stage task manager evolving from CLI to Tkinter GUI.
- Integrated JSON storage with task filtering, sorting, and editing.
- Documented system design, test cases, and user manual for usability.

2. HelaDry: Solar-Powered IoT Dehydrator

2025(October)–2026(March)

Tools: C/C++, Python, HTML/CSS, IoT, UML Modeling

- Developing a smart hybrid solar dehydration system to effectively reduce post-harvest crop loss.
- Programming IoT sensor hardware using C/C++ and building the project web interface using Python and HTML.
- Designing detailed system architecture diagrams (UML) and the Business Model Canvas to guide agile development.

3. Portfolio Website

2025(May)–2026(April)

Tools: HTML, CSS, JavaScript

- Building a fully responsive personal portfolio website to showcase all my academic and software projects.
- Adding animated sections, smooth navigation, and modern UI components to improve user engagement.
- Expanding the site with new pages, updated project cards, and interactive elements as part of an ongoing redesign.
- Aiming to turn it into a complete online profile with project previews, downloadable CV, and contact features.

Teamwork & Leadership Evidence

- Demonstrated leadership as the Treasurer of the School ICT Society, managing responsibilities and supporting organizing activities.
- Gained strong teamwork experience through participation in school Volleyball and Athletics teams.
- Took initiative in coordinating tasks and contributing to team collaboration during university group projects.

Achievements

- School Volleyball Team (2018–2021)
- School Athletics Team (2015–2019)
- Treasurer, School ICT Society (2022)
- Completed multiple Python and web development projects
- Self-learning Blender 3D modeling and UI/UX basics
- Built a responsive personal portfolio website
